

Angels TruMedia Advance Scouting Exercise

Part 1:

a) Fastball: Sits around 93 with some ride. Has characteristics of a cutter when pitching to lefties. Great command, can control both sides of the plate.

Curveball: Low 70's offering with 12-6 break. Solid command of the pitch. Does tend to leave it up in the zone causing it to get overly loopy.

Slider: Revamped pitch that now sits in the high 80's. Has a tighter downward break with less sweeping action than the previous iteration. New mechanics allow more control as well.

Change-up: Mid 80's offering that is strictly used against righties. Able to kill spin and induce depth. Has shown the ability to command it effectively but not consistently. Will leave it out over the plate at times causing issues.

b) A three pitch mix consisting of a fastball, curveball and slider. Primarily sticks with the fastball and slider while curveball is used sparingly as a show me pitch. Likes to use slider early in the counts to get ahead and will use fastball (up in the zone) and slider (low and away) as put away pitches.

c) A four pitch mix consisting of a fastball, curveball, slider and changeup. Typically starts an at bat with a fastball or curveball. Will throw changeup if ahead in the count otherwise will stick with the fastball (high and away). Slider (low and in) is the primary put away pitch.

* Does have a sinker but it is rarely used and has similar movement to his fastball.
